powder at a rate of 2 ounces of water to 1 pound of dry powder. Proper consistency is a stiff, putty-like mixture.

Application

Pre-dampen surface. Force material into place with a trowel or wide blade putty knife to make sure material makes good contact with the surface to be repaired. After 10-15 minutes, the material may be shaped or shaved with a trowel to get a desired look. Do not apply if temperature is likely to fall below 40° F within 12 hours.

Curing

Sets in 4 hours at 70° F. Allow 8 hours curing time before permitting vehicle traffic. (Curing time may vary slightly due to temperature and humidity conditions.) If applied in direct sunlight, or when temperatures exceed 70° F, lightly spray surface with water once daily for 2 days.

Clean Up

Typically water will satisfactorily clean tools after using the product. If the material has begun to harden, warm soapy water may be helpful for cleaning hands and tools.

Warranty:

Seller warrants that its product will conform to and perform in accordance with the product specifications. The foregoing warranty is in lieu of all other warranties, express or implied,

including, but not limited to, those including merchantability and fitness for a particular purpose. Because of the difficulty in ascertaining and measuring damages hereunder, it is agreed that, seller's liability to the buyer at no point for any particular project shall exceed the total purchase price of said product.
